Telephony

University of Freiburg

- Package *android.telephony* provides classes to monitor basic phone information, tools to manipulate phone numbers and to work with SMS[1].
- Most important class is *TelephonyManager*[4].
- Provides access to information about telephony services of the device.
  - For example network type or call state, which indicates idle or ringing.

```
Context.getSystemService(Context.TELEPHONY_SERVICE);
```

---

- Very limited access to work with calls for security reasons.
- Possibility to place a call from activity if permissions are set.
- Extend Android manifest:

```
1 <uses-permission android:name="android.  
  permission.CALL_PHONE"></uses-permission>
```

- There are ways to interfere a bit more: Listen to phone state change to ringing and then mute phone.

---

---

---

---

---

- How? Create *Intent* with predefined action.

```
1 try {  
2 Intent callIntent = new Intent(Intent.  
  ACTION_CALL);  
3 callIntent.setData(Uri.parse("tel:1234567"));  
4 startActivity(callIntent);  
5 } catch (ActivityNotFoundException e) { ... }
```

Notizen

---

---

---

---

---

---

---

- Extend Android manifest:

```
1 <uses-permission android:name="android.  
  permission.VIBRATE" />
```

- Use *AudioManager* to manipulate ringer mode.
- Get instance of *AudioManager*:

```
1 AudioManager Context.getSystemService(Context.  
  AUDIO_SERVICE)
```

## Telephony

Example mute phone continued  
University of Freiburg

- Method to change the ringer mode used with parameters `RINGER_MODE_NORMAL`, `RINGER_MODE_SILENT` or `RINGER_MODE_VIBRATE`:

```
1 void AudioManager.setRingMode(int ringerMode)
```

## SMS

University of Freiburg

- Class `SmsManager` can be used to send and receive SMS from an application<sup>[3]</sup>.
- Extend Android manifest with needed permissions:
  - `android.permission.SEND_SMS`
  - `android.permission.RECEIVE_SMS`
  - `android.permission.READ_SMS`
  - `android.permission.WRITE_SMS`

```
1 <uses-permission  
2 xmlns:android="http://schemas.android.com/apk/  
   res/android"  
3 android:name="enter_permission_name_here">  
4 </uses-permission>
```

## SMS

How to use `SmsManager`  
University of Freiburg

- Receive reference to `SmsManager`

```
1 static SmsManager SmsManager.getDefault();
```

- Send message

```
1 void SmsManager.sendTextMessage(  
2 String destinationAddress,  
3 String srcAddress,  
4 String text,  
5 PendingIntent sentIntent,  
6 PendingIntent deliveryIntent);
```

## Calendar

University of Freiburg

- To access the built-in calendar the Android manifest has to be extended[7]:

```
1 <uses-permission android:name="android.  
  permission.READ_CALENDAR">  
2 </uses-permission>
```

- Data can be accessed through a Content Provider and a Cursor.
- The Content Provider for the calendar has the following URI:

```
1 content://calendar/calendars
```

## Summary

University of Freiburg

- Functionality to monitor phone information included in class *TelephonyManager*.
- Application can place calls, but not much more for security reasons.
- Muting phone when phone state changes to ringing allows more interference.
- *SmsManager* allows sending of SMS.
